Madras.

Sir,

I have the honour to state that the Head-Master of the Municipal High School, Bellary, reports that the layers of thatch constituting the roofs of the school sheds have become so thin and ~~ragged~~ that they are absolutely no protection against the action of the rain. During last rainy season the sheds leaked so badly that on some days classes could not be held at all in those sheds and boys had to be sent away. I have got an estimate prepared for RS:300/- for the necessary repairs required for these sheds, a copy of which is herewith enclosed. I request that the Government will be pleased to sanction the estimate and issue orders for the payment of the amount. The work has been started as it is of an

urgent nature.

Resubmitted to Government with reference to their Memo No.13967-1 L and M dated 13-6-23.

2. In view of the slender resources of the Municipality I recommend that the Chairman may be permitted to incur the expenditure and include it in the statement of charges for 1923-24 to be submitted by him in 1924-25.

3. Necessary provision will be made in Part II of the Budget Estimate of 1924-25 for the purpose.

NOTES.

1. This form should be used for all estimates, whether relating to original works or repairs.

2. A sanction to an estimate must invariably be regarded as strictly limiting the expenditure to the precise objects detailed in the estimate. Any anticipated or actual savings on a sanctioned estimate should not, without the special orders of the Chairman, be utilised for any additional description of work not originally contemplated when the estimate was sanctioned, or not fairly contingent on the actual execution of the work concerned.

3. It is the duty of the officer in charge of the work to report to the Chairman any deviation which is likely to alter its character, or to cause any excess over the total amount of the sanctioned estimate, but if the deviation is trifling, and if the excess is not likely to exceed 10 per cent. of the estimated cost, the work may be completed with the written sanction of the Chairman. The deviations should, however, be reported to the Council and its sanction obtained for the admission of the excess charges. If, on the other hand, the deviations are likely to materially alter the character of the work, or if it is probable that estimated cost will be exceeded by more than 10 per cent., a revised estimate, accompanied by a comparative statement of differences in Form No. 76, should be submitted at once so as to enable the sanction of the Council or the authority concerned to be obtained in time.

4. In the case of road works, care should be taken, when the collection of materials is provided for, to deduct any quantities already at site, and also to attach a statement in Form No. 88 for the balance to be collected.

5. Data should be given in the remarks column of Part II of the Estimate for all consolidated rates not traceable in the schedule of rates in Form No.77.

6. In the case of sanctions accorded by any authority other than the Council, the particulars thereof should be noted at foot of the last page

The promise to bear the rent cost of a school does not cover rental charges on account of improvements to buildings. The rent of the building in which the Municipal High School, Bellary, is at present located is, however, included in the rent cost of the school. The proposal to include the cost of repairs to the sheds* also in the rent cost may be accepted in the special circumstances of
